

A Military Child Education Coalition® Initiative

Please come join us at  
Bonsall Elementary School  
for an informative  
**Preventing the Summer Slide**  
Parent to Parent workshop  
**Monday 18 May 2015 at 815a**

Military Child Education Coalition *Parent to Parent Team*  
will be presenting this **informative** workshop for  
**ALL** families, parents and children

- Research shows, on average, children's reading skills regress by 25% over summer vacation.
- Math skills also suffer during summer break and it typically takes teachers anywhere from four to six weeks to get students back on track in the fall.
- Educators commonly refer to this phenomenon as the "summer slide."

*This workshop will uncover simple ways parents can engage their children in educational activities during the summer without them even noticing they are doing it!*

**All are welcome!**
